

# Responsible Energy Starts With Us

Competitive  
Power Ventures, Inc.

With decades of experience, CPV is a tight-knit group of energy professionals dedicated to increasing America's energy sustainability by providing safe, reliable, cost-effective and environmentally responsible electric power.

We are committed to being a good corporate citizen in the communities where we build and operate—for us that means integrating Environmental, Social and Governance (ESG) matters into the business.

Our focus on ESG and sustained track record of success have enabled us to grow into the number one thermal developer in the United States and one of North America's premier energy companies.

— Gary Lambert, CEO  
Competitive Power Ventures

## VISION

Be the premier power generation developer and asset manager in the United States

## MISSION

Modernize North America's power generation to increase reliability, reduce costs, and minimize environmental impacts

Making lives better is what drives us to modernize the country's power system. Underlying our goal is the positive economic impact we're having on the communities where we build and operate power generation facilities.

## WHAT WE DO

- ✦ **Deployment of Latest Power Generation Technologies**
  - Natural Gas
  - Wind Energy
  - Solar Energy
- ✦ **Asset Management**
- ✦ **Environmental Health & Safety**

## OUR COMMITMENT

CPV is committed to displacing older fossil generation with new natural gas-fired facilities that will dramatically reduce emissions, maintain reliability and help expand renewables.

We recognize that grid-scale wind and solar projects are increasingly cost competitive and compatible with flexible natural gas technologies.

These technologies, combined with CPV's world class development capability, will help states meet their emission goals.

## **OUR PARTNERS**

### **Communities**

CPV works with and in the communities we serve through partnerships with local schools, emergency responders, and economic development institutions.

### **Financial Partners**

We partner with some of the most respected, experienced, and low-cost capital providers in the world. Access to such low-cost debt and equity capital enhances our ability to deliver the lowest cost electricity to consumers.

### **Technology Providers**

Our global technology partnerships ensure we approach each energy challenge with the latest, most efficient and environmentally sound technology solution available in the world. We regularly work with industry-leading technology providers to achieve twice the efficiency of older power generation!

## HOW WE GIVE BACK

“At CPV we dedicate our charitable giving efforts to education and emergency responders in the communities where we develop, build and operate power generation facilities. We consider it a privilege to have a hand in educating future generations and in supporting our police and fire departments who help keep the public safe.”

– Gary Lambert, CPV CEO

## **EDUCATION**

Our education support ties to Science, Technology, Engineering and Math (STEM) in the communities where we develop, build and operate projects. Our model includes developing and funding new STEM labs, visiting classrooms and providing career coaching from CPV staff, and offering guided tours of CPV's facilities.

## **EMERGENCY RESPONDERS**

CPV supports emergency responders in our host communities by working closely with police and fire departments, sponsoring public safety events such as National Night Out, and helping community organizations that emergency responders support to better the local community and their relationships with residents.

## COMMITTED TO THE ENVIRONMENT

We leverage cutting-edge renewable and natural gas power technologies to provide environmentally responsible solutions

- ✦ Focused on developing grid-scale renewables and natural gas generation
- ✦ Strong track record of developing more than 4,500 MW of wind generation, and growing
- ✦ Displacing older fossil generation with fast-ramping, new gas-fired plants which reduces emissions and helps expand renewables
- ✦ Most efficient rating of CPV's latest combined-cycle facility means we generate more power using less fuel
- ✦ Environmental audits by independent third parties

## COMMITTED TO SAFETY

We consistently demonstrate our safety compliance and aim for above-average safety performance in our industry

- ✦ Safety record better than industry average
- ✦ Safety performance regularly in the top quartile of electric generators
- ✦ Comprehensive Emergency Response Plans in place at all CPV facilities, as well as regular onsite safety meetings and drills
- ✦ Safety audits by third parties

## COMMITTED TO COMMUNITIES

We dedicate ourselves to being a good corporate citizen in the communities where we build and operate

- ✦ \$1 billion+ economic development projects in areas of need, providing well-paying, long-term jobs & community improvements
- ✦ Charitable giving strategies & funding annually to support education & emergency responders
- ✦ Mobilizing our workforce to volunteer in our host communities by participating in town clean-up days, reading to schoolchildren, and donating time to local organizations

West Point Military Academy Civil Engineering Cadets tour CPV Valley Energy Center under construction to learn about electric generation development.
