

CPV PAXTON SOLAR

CPV Paxton Solar is a proposed 200-megawatt (MW) photovoltaic (PV) solar installation in Ford County, Illinois.

Projected Economic Benefits

- Represents an estimated **\$450 million investment**
- Creates **over 200 jobs during construction**, paying millions of dollars in wages and benefits
- Invests millions of dollars in **network upgrades**, improving the grid, and increasing the **availability of cost-efficient power** for Illinois households
- Adds **~\$38 million** over the life of the project in local revenue for Ford County to support schools, municipal budgets, road maintenance, and emergency services

Increased Local Production

- Up to **466,806 megawatt-hours (MWh)** of new generation annually
- Will generate enough electricity to power **44,458** average Illinois households

Responsible Development

- Supports local philanthropic initiatives with a focus on **addressing food insecurity, STEM education, and emergency responders**

Location	Illinois – Ford County
Total Installed Capacity	200 MW
Start of Construction	Est. Q4 2028
Commercial Operations	Est. Q2 2030
Investment	\$450 Million
Electrical Interconnection	Gibson City to Paxton 138 kV

Competitive Power Ventures (CPV) has 25 years of unprecedented success in the development and operation of highly efficient and low emitting electric generation and renewable projects in the United States. CPV is focused on applying its development, financial and project management expertise to advance the next generation of technologies. After bringing on 6.8 GW of natural gas, wind, and solar generation since 2010 and with a current pipeline of over 10 GW of renewable and dispatchable generation projects, including utility-scale carbon capture, CPV is well positioned to help drive the nation's decarbonization goals forward.
